Duplicated font names should be removed

Analyze your code

Code Smell Major ?

Having duplicated font names doesn't help to read the font declaration and may be an indicator the author of the line was not sure how to configure it. This rule raises an issue when `font` or `font-family` properties contain a duplicated font name. This rule ignores `$sass`, `@less`, and `var(--custom-property)` variable syntaxes.

Noncompliant Code Example

```
a {
  font-family: 'Georgia', Georgia, serif; /* Noncompliant */
}
```

Compliant Solution

```
a {
  font-family: Georgia, serif;
}
```
