Flex static code analysis

Unique rules to find Bugs, Security Hotspots, and Code Smells in your FLEX code

- All rules 76
-  Vulnerability 5
-  Bug 9
-  Security Hotspot 1
-  Code Smell 61

Tags ▾

Search by name... 

Security.allowDomain(...) should only be used in a tightly focused manner	
The flash.system.Security.exactSettings property should never be set to false	
Dynamic classes should not be used	
"LocalConnection" should be configured to narrowly specify the domains with which local connections to other Flex application are allowed	
"default" clauses should be first or last	
Event types should be defined in metadata tags	
Event names should not be hardcoded in event listeners	
The special "star" type should not be used	
Variables of the "Object" type should not be used	
Methods should not be empty	
Constant names should comply with a naming convention	
All branches in a conditional structure should not have exactly the same implementation	
Classes that extend "Event" should	

Track lack of copyright and license headers

Analyze your code

-  Code Smell
-  Blocker
- 

Each source file should start with a header stating file ownership and the license which must be used to distribute the application.

This rule must be fed with the header text that is expected at the beginning of every file.

Compliant Solution
