Security.allowDomain(...) should only be used in a tightly focused manner		Vulnerability
The flash.system.Security.exactSettings property should never be set to false		Vulnerability
Dynamic classes should not be used		Code Smell
"LocalConnection" should be configured to narrowly specify the domains with which local connections to other Flex application are allowed		Vulnerability
"default" clauses should be first or last		Code Smell
Event types should be defined in metadata tags		Code Smell
Event names should not be hardcoded in event listeners		Code Smell
The special "star" type should not be used		Code Smell
Variables of the "Object" type should not be used		Code Smell
Methods should not be empty		Code Smell
Constant names should comply with a naming convention		Code Smell
All branches in a conditional structure should not have exactly the same implementation		Bug
Classes that extend "Event" should		

"switch" statements should have at least 3 "case" clauses

Analyze your code

-  Code Smell
-  Minor?
-  bad-practice

switch statements are useful when there are many different cases depending on the value of the same expression.

For just one or two cases however, the code will be more readable with if statements.

Noncompliant Code Example

```
switch (variable) {
  case 0:
    doSomething();
    break;
  default:
    doSomethingElse();
    break;
}
```

Compliant Solution

```
if (variable == 0) {
  doSomething();
} else {
  doSomethingElse();
}
```
