## Flex static code analysis

Unique rules to find Bugs, Security Hotspots, and Code Smells in your FLEX code

**∰** Bug

9

Security Hotspot (1)

	ecurity.allowDomain() should only a used in a tightly focused manner
6	Vulnerability
fla	ne ash.system.Security.exactSettings operty should never be set to false
6	Vulnerability
D	ynamic classes should not be used
e	Code Smell
do	ocalConnection" should be onfigured to narrowly specify the omains with which local connections other Flex application are allowed
6	Vulnerability
"d	efault" clauses should be first or last
e	Code Smell
	vent types should be defined in etadata tags
e	Code Smell
	vent names should not be hardcoded event listeners
Q	Code Smell
	ne special "star" type should not be sed
Q	Code Smell
	ariables of the "Object" type should ot be used
Q	Code Smell
М	ethods should not be empty
a	Code Smell

naming convention

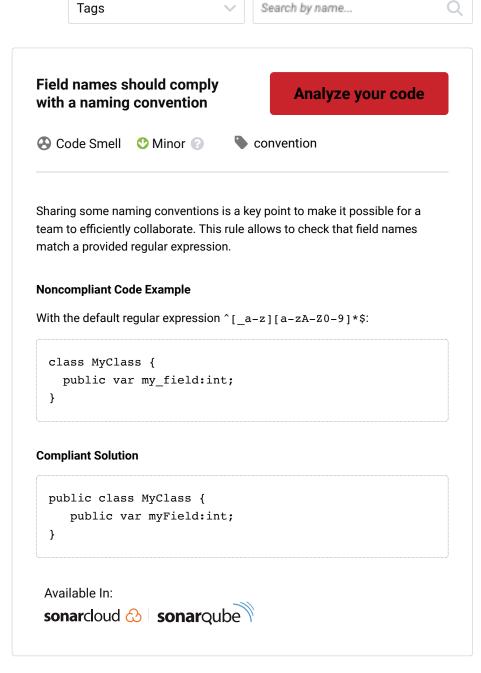

All branches in a conditional structure should not have exactly the same

Classes that extend "Event" should

Code Smell

implementation

📆 Bug

override "Event.clone()"  • Bug
Constructors should not dispatch events
Rug
"ManagedEvents" tags should have companion "Event" tags
<b>∰</b> Bug
Objects should not be instantiated inside a loop
Two branches in a conditional structure should not have exactly the same implementation
Constructor bodies should be as lightweight as possible
Only "while", "do" and "for" statements should be labelled
Statements, operators and keywords specific to ActionScript 2 should not be used
"for" loop stop conditions should be invariant
Unused function parameters should be removed
