Build a Portfolio Using Bootstrap

Test your HTML knowledge, and then use CSS to style your own page and make it unique.

Start Project

Projects   Build a Portfolio Using Bootstrap

Project Overview

You'll build a personal web page using Bootstrap, which should look similar to this one:

Morgan McCircuit   Home   About

Who I am

Hi, my name is Morgan McCircuit and I love to write code that is
efficient. I love innovating without reinventing the wheel!

● ○ ○

HTML & CSS

I slice designs in my dreams. I love
turning work-of-arts into working apps.

JavaScript

Making the web come to life with
Angular or React is my jam!

RESTful APIs

The tried-and-true way of writing back-
end services for my client-side apps.
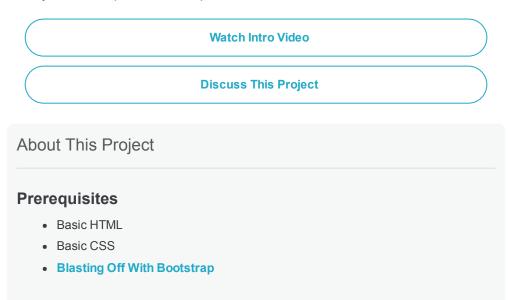

What You'll Use

- HTML
- Bootstrap

We'll start you off with a few CSS styles that you can build on that should help
get things started.

What You'll Learn

You will further your Bootstrap skills, feel more comfortable writing Bootstrap
code in a real-world scenario, and have the option of using this project as your
real portfolio page.

Live Demo

Check out this link to see a working version of this project. Feel free to
customize your project even further by adding more custom CSS styles to it
once you've completed the steps.
